

greenbuildingproducts.eu

The 1st database for products assessed in terms of LEED[®] & DGNB[®] criteria

The database for:

- Construction material producer
- Product manufacturer
- Framework manufacturer

Do you present yourself as a sustainable company?

The importance of sustainability of buildings in the real estate business is increasing rapidly. Well-known major projects as for an example the refurbishment of the Deutsche Bank towers in Frankfurt, the Commercial Center in the Hafencity in Hamburg or the Dubai Towers in Doha are carried out by taking account of the third party certification criteria of LEED or DGNB.

With the establishment of those Green Building certification authorities and systems new standards are set. For this reason building products also need to meet those new requirements.

Do you ensure your competitive advantage?

Within Green Building projects your customers whether as a construction material producer, product manufacturer, framework manufacturer, accredited DGNB[®] Auditor or a LEED[®] Accredited Professional are confronted to include products which meet the requirements of the certification authorities.

In doing so the investigation as well as the furnishing of proofs and documentation on the building is causing a huge expenditure of time.

Do use your chance to advertise the sustainability and conformity of your products. Due to that fact we set ourselves with the onlineproduct database...

www.greenbuildingproducts.eu

...to create and provide a free of charge solution for your customers, which is enabling them to find products with assessed LEED[®] and DGNB[®] criteria fast and easy – why not finding yours?

Our service – your competitive advantage.

- Classification of your products according to the LEED[®] and DGNB[®] criteria.
- furnishing of proofs and documentation.
- Inclusion of your assessed products in the online-product database.

Own experiences are the base for the created solutions.

Do benefit from our huge experience in small-, medium- and major scale projects as an accredited LEED AP, BREEAM Assessor and DGNB Auditor.

The sustainable platform to present your sustainable products.

Do you have any further questions about how you can benefit of the advantages of our database? Please do not hesitate to contact us.

Your customers: At the moment in Europe more than 500 LEED[®] Accredited Professionals, 250 DGNB[®] Auditors and a much higher number of owners, architects, planners and construction companies are working on more than 1000 registered medium and major scale projects.

The search result is including:

- declaration sheet for specific product,
- technical data sheet,
- contact information of the manufacturer.

- Do use your competitive advantage against non-listed products:
- by proven conformity of your products according the system criteria,
- promotional effective and customer oriented product placement,
- positive image concerning sustainability,
- and assert yourself on the market.

It's that simple!

Visit us on the internet: www.greenbuildingproducts.eu

Registration:

Register yourself free of charge and have a how the database is generating benefit for your customers.

Please contact us:

We would appreciate to consult and support you by assessing your products according to the certification criteria as well as in furnishing of proofs an documentation for your products.

Declaration of products:

All paints, adhesives, coatings, floor coverings, floor coatings, wood-based materials, bitumen products, oils, waxes and a variety of other products could be assessed.

Declaration of conformity:

You will receive your declaration sheet with the assessment results and your products will be listed in the online product database.

Further contact information on next page...
